

PREFACE

Post 2019, there were several changes in the public financial management in the UT- the most important being adoption of General Financial Rules, 2017, the guidelines for Execution of works, purchase of goods, employment of consultants. In order to familiarise DDOs with the changed scenario of these rules and regulations in a compendium and also provide examinees of various departmental examinations, with a comprehensive book containing all these rules to be applicable to the UT administrations in a Question/Answer format. Some DDOs may be familiar with the changes, but a large number may need a recap and updation to various changes in rule contained in GFRs, 2017, Manuals on Procurement of works, Goods and Consultancy services. This handbook is, therefore, a precise guidance note.

I am hopeful this guidance note will serve its desired objective.
